

 **Telecrafter Products**

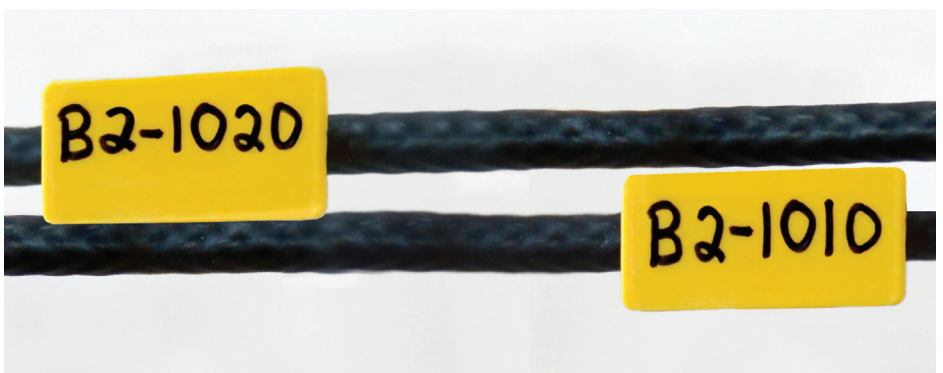

Designing, manufacturing, and delivering quality drop supplies

At Telecrafter Products, we design and manufacture products to assist broadband and fiber providers and installers in their drop installations, protecting the quality of the signal and the life of the drop.

Our products are of the highest quality. They meet the needs of the industry by contributing to efficient installations today, and efficient drop maintenance for many years to come. Since the founding of our company in 1977, we have continually refined, improved, and expanded on the products we produce and sell.

We appreciate your interest and welcome your comments. If you have any questions, please contact us and we'll be happy to help!

S7WH-SD	.220" - .280"	7/8"	Self-Drilling	White	Bag of 100

Combination slotted, phillips, hex-head screws are long-lasting. Their yellow zinc coating resists corrosion, and meets or exceeds most salt-spray standards. The screws provide 1/2", 9/16", 5/8", 7/8", or 1-1/8" surface penetrations.

Most Flex Clips™ are available with self-tapping or self-drilling screws.

RB Clip Gun Systems

Patent numbers available upon request

The RB Clip Gun System is the only “hand tool applied” cable fastening system that ensures a perfect, error-free cable installation. This system eliminates staple nicks, pinching, compression, accidental damage from hammer blows, and kinked staples. For installing cable onto wooden surfaces there is no equal.

The lightweight clip guns are easy to load and shoot, and installations are flawless. Tool refurbishments are complimentary.

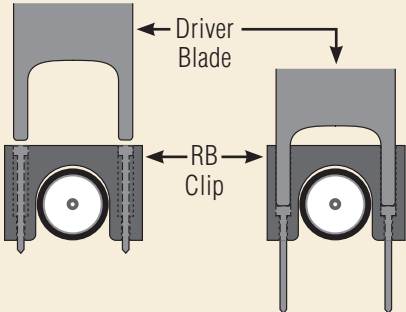

RB-3 Telephony Clip Gun

4+mm Fiber & Cat 5 Clips

Part #	Description	Color	Quantity
05LG	400 Cat 5 Wire Clips	Light Grey	Box of 400
05NW	400 Cat 5 Wire Clips	Neutral White	Box of 400

Part #	Description	Quantity
RB-3	RB-3 Clip Gun	Each

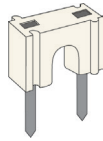

Two independent nails are driven out of the clip housing, securely holding the cable in place without pinching or deforming. Cable is installed quickly and flawlessly.

Lock-in™ Vinyl Siding Clips

The head of the Lock-in™ Vinyl Siding Clip grabs the edge of the interlocking siding, while the barbs on the back hold the clip in place with enough pressure to prevent the clip from backing out. It also features a notch at the bottom that accommodates a flat head driver blade for easy installation. Just place the cable inside the clip and tap the clip up and into the siding until it catches the edge.

Quantity: Bags of 100

Push-in Clips

Push-in Clips attach coax to drywall, stucco, brick, or mortar. Each clip features barbs that are designed to grab the inner side of a 1/4" predrilled hole and hold tightly without backing out. The installations are secure, neat, and professional. A low profile allows the clip to almost disappear and a collar closes the hole against water ingress.

Quantity: Bags of 100

Identification Markers

- Longest lasting
- Will not damage the cable
- Stay where they're applied

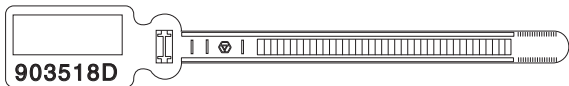

Accurate drop identification is more important than ever, not only to identify subscribers and services for field technicians, but also to convey important facts about your systems to others. Made from a weather-resistant UV stabilized proprietary material for utmost durability, Telecrafter Products Cablemarkers will withstand the passage of time.

Serialized Markers

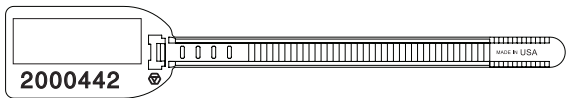

The information provided by a serialized tag makes service calls more efficient, prevents costly errors, and assists field tech in detecting and correcting discrepancies. The 7-digit, never-duplicated, stock inventory numbering sequences are heat imprinted for permanent identification. **Tie wrap: 3"**

Color Code Markers

Where the only marking need is to highlight active drops or the type of service, tamper-resistant Color Code Markers offer economical identification. These tags stay where you put them and, whether inside enclosures or outside in the harshest weather conditions, they will outlast the life of the drop.

Other Products

Snap-Guard™ Cable Conduit

Keep cable safely away from damage

Screw in the T-clips and press the conduit over the clips to snap it in place. The interlocking guard and clip provide a firm “can’t fall off” installation and there is no hardware exposed on the home.

Manufactured of UV stabilized exterior grade PVC, SnapGuard™ is extremely long-lasting and resistant to temperature extremes.

House Boxes

Control Box

Omni Box

Durable and tamper-resistant
Professional appearance
Fully removable top for ease of access

Enclosing the drop at the residence protects components from tampering and professionalizes the appearance of the installation. These easy-to-use enclosures bring service and disconnect information down from the pole and in from the pedestal. All boxes are molded from weather-resistant UV stabilized polyethylene.

Quantity: Carton of 50 unless noted

Locks & Links

Tele-Theft Control Lock

Access Control Lock

Durable and tamper-evident
Individually numbered
Reusable lock bodies

Tele-Theft Control Seals are the industry’s premier solution to field problems caused by utilizing conventional steel locks as sealing devices. The use of specialty tools to gain access to enclosures are eliminated, the color-coded numbered sealing links must be severed to open the enclosure. Unauthorized access is easily identified and auditing procedures can be performed efficiently. *Tele-Theft Control Locks and Sealing Links must be shipped directly to operators of broadband delivery services.*

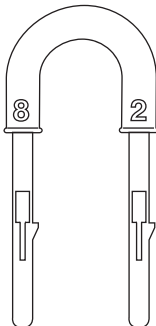

Access Control Seals incorporate the advantages of the Tele-Theft Control Seal by providing a sealing link that can be severed by hand. No tools are necessary, the proper twisting of the link against the lock body will break the sealing link.

Quantity: Bags of 100

Pull-Tight Security Seals

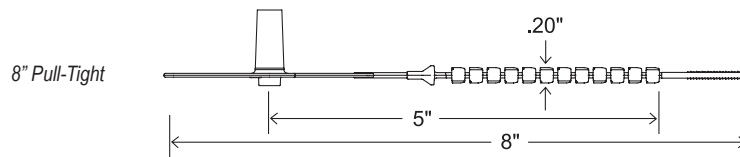

U.S. Patent 7,559,587 and 7,703,817 B2. International patents issued and pending.

Secure Durable Economical

Pull-Tight Security Seals offer unparalleled tamper-evident security for cargo containers, storage cabinets, tote boxes, etc. Every numbered seal of each color and length is uniquely serialized and they can be imprinted with a custom identification. Manufactured of a form of UV stabilized polypropylene, Pull-Tights are virtually impervious to hot and cold weather extremes.

Fitting Savers

Preattached rubber grommet seals out the elements
Threaded on both ends for maximum use
Easy to use and reuse

Not only does the Fitting Saver seal out moisture, prevent damage, and eliminate ingress—it also improves the aesthetics of disconnected drops in the field, saves time during service calls, and saves money by eliminating the cost of a replacement fitting.
Shipped in bags of 100

Part #	Description	Color
FTRM	Fitting Savers	Grey

Custom Combo Screws

Corrosion resistant finish
Custom combo phillips-slotted-hex head
7/8” and 1-1/4” lengths

These #8 steel screws are extra long-lasting with yellow zinc baked coating that exceeds most salt-spray standards. They are not threaded all the way up to the head to reduce the probability of damage caused by screw overtorque.
Minimum order: 3 bags of 100

Part #	Description
SCRW	Custom Combo #8 Screw - 7/8”
SCRL	Custom Combo #8 Screw - 1-1/4”
