

Overview

Cisco OC-12/STM-4 Short-reach (2 km) 1310-nm Wavelength, LC Connector 3rd Party Transceiver Module. The SFP transceiver modules are hot-pluggable I/O devices that plug into module sockets. The transceiver connects the electrical circuitry of the module with the optical or copper network. You can use any combination of SFP transceiver modules that your Cisco device supports. The only restrictions are that each port must match the wavelength specifications on the other end of the cable and that the cable must not exceed the stipulated cable length for reliable communications. Use only Cisco SFP transceiver modules on your Cisco device.

Quick Specs

Figure 1 shows the appearance of SFP-OC12-SR.

Table 1 shows the Quick Specs.

Product Name	SFP-OC12-SR
Device Type	Transceiver module
Form Factor	Plug-in module
Interface (Bus) Type	SFP (mini-GBIC)
Connectivity Technology	Wired
Line Rate	OC-12/STM-4
Wavelength	1310-nm
Max Transfer Distance	2 km
Fiber/Cable Type	Multi Mode Fiber (SMF)
Connector	LC duplex connector
