ONT-ENC-LA shown with typical FTTx components (not included)

The ONT-ENC-LA is an indoor enclosure designed to hold the components of a typical Fiber to the Home installation including Indoor Optical Network Terminal, Power Adapter, and Tii's 68M-2-2T Connectivity Block. It is designed to mount to a wall, or directly on top of an optional slack storage enclosure, Tii model ONT-SSENC-LA, which can accommodate greater than 50 ft. of flat drop fiber with adjustable fiber retention fingers. The design constrains "springy" drop cable in a way that maintains a bend radius greater than 6 inches.

The ONT-ENC-LA provides a flexible component mounting scheme to support a variety of ONTs and power adapters, and is designed to ensure a proper thermal environment for active components using vents and spacing for ample airflow. An adjustable mechanism is provided to allow mounting of any future ONT up to 9 x 9 x 2.5 inches. The enclosure provides integrated cable management and strain relief features for interior and exterior cables.

KEY PRODUCT BENEFITS

- ▶ Aesthetically pleasing for indoor use
- ▶ Matches the look and feel of Tii's ONT-SSENC-LA
- ▶ Mounts directly to wall, or on top of fiber slack storage unit ONT-SSENC-LA
- ▶ Mounting provision for OptiTap® hardened fiber connector to SC Adapter (not included)
- ▶ Integrated fiber slack storage for bend insensitive fiber jumper to ONT
- ▶ Integrated cable management and strain relief features for cable entry/exit ports
- ▶ Adjustable ONT mounting scheme accommodates any ONT up to 9 x 9 x 2.5 inches without the use of tools
- ▶ Supports mounting of multiple power adapters
- ▶ Integrated routing channel and strain relief for PA power/alarm cable
- ▶ Design optimized with vents for thermal management

INDUSTRY STANDARDS

- ▶ UL Listed to 2416
